1. The data used in calculating rate base are averages.
2. Calculate those averages by summing the first-of-year and the end-of-year figures for each account and then dividing the sum by two.

2000 Analytical Review DWCCA-4040-ELE

Dear Mr. Flynn:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. On page W-17, it appears 5/8 inch meters are tested less than Wisconsin Administrative Code 10-year intervals. Please furnish an explanation. In the future, when meters are tested less than code intervals, please furnish a schedule footnote.
2. In the 1999 review, it was indicated that corresponding dollars for the three water services reported retired on page W-16, would be retired from utility plant in service Account 345, Services, in 2000. It appears the corresponding dollars were not retired. Please furnish an explanation.
3. Please state why dollar additions were not made on page W-8 to Account 348, Hydrants, corresponding to the addition of four hydrants on page W-18, column C.
4. On page F-2, \$1,481 is reported in Account 421, as "penalties." If this is for late payment charges, it is more appropriately reported in Account 470, Forfeited Discounts, in the future. Please furnish an explanation.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 266-3768. Please respond within 30 days of this letter. We prefer that you respond by e-mail if it is convenient

WATER OPERATING SECTION FOOTNOTES

Water Operation & Maintenance Expenses (Page W-05)

The increase in account 623 is due to work that was done to rebuild 2 pumps in 2000, this is not a recurring cost and thus there was an increase in expenses in 2000.

The decrease in account 923 is due to fewer projects and planning for projects going on in 2000 as compared to 1999.

Water Mains (Page W-15)

The current year additions to water mains were financed through a local construction company. The construction company put in the mains and paid for them. The mains hook up the construction companies building to the city water mains.

Water Services (Page W-16)

The cost of services is charged to the property owner at the time that the service is installed.

Meters (Page W-17)

The adjustment to 2 inch meters was made to adjust the balances for the physical count.

Hydrants and Distribution System Valves (Page W-18)

Discussed the operation and testing of distribution valves with the utility superintendent, he miscalculated the number of distribution valves and did not test quite enough, the full one half will be tested in 2001.

Per review response, there were no additions, they should have been adjustments. ele
